

Job Summary

Flores Automation is growing! Due to our continued success we have an immediate need to add an experienced Service Technician to our team. If you have experience installing and wiring control panels and equipment and like a family yet fast paced environment, we encourage you to apply. The position is at our headquarters in Muskego, WI which includes a modern manufacturing facility.

Responsibilities and Duties

Primary purpose is to install and wire control panels and associated hardware on plant and mobile equipment. Secondary purpose is to build and wire control panels in house per engineering specifications and company quality standards.

Qualifications and Skills

The following skills will ensure success in this exciting role:

- Minimum 2 years of proven successful working experience in electrical control panel wiring and installation.
- 2-year technical degree in related field.
- Solid organizational skills to include attention to detail and multitasking.
- PLC programming experience preferred.
- Mobile control programming experience preferred.
- General knowledge of relevant NEC, NFPA, and relevant standards.
- Competent use of relevant software including Microsoft Office and related tools.
- Ability to travel frequently to customer locations.

Compensation

Compensation will be based on experience. This is a full-time hourly position with full benefits.
