

Job Summary

Flores Automation continues to grow and expand through forward thinking innovation, superior quality, and awesome customers! As we continue to grow, we are looking to add an Electrical Engineer to our team at our headquarters in Muskego, WI.

If you enjoy a variety of innovative projects within a family yet fast paced environment, we encourage you to apply.

Responsibilities and Duties

Primary responsibilities will include planning, designing, programming, testing, and starting automated systems. Ensuring systems meet high quality standards, internal and external specifications, and established budgetary estimates. Occasional travel to customer sites is expected.

Qualifications and Skills

To help ensure success in this exciting role the following background is preferred:

- Minimum 2 years of proven successful working experience in electrical controls engineering.
- 4-year technical degree in related field.
- Solid organizational skills to include attention to detail and multitasking.
- Minimum 2 years experience designing industrial control systems.
- Minimum 2 years PLC programming experience.
- Minimum 2 years AutoCAD experience.
- Minimum 1 year experience with robotics and vision systems.
- Knowledge of IEEE, NFPA, and relevant standards.
- Competent use of relevant software including Microsoft Office, Gantt charts, and related

tools.

In addition, the following characteristics will provide a solid fit:

- Team player
- Detail oriented
- Excellent communication skills
- Strong decision-making ability
- Highly motivated
- Able to work independently and with a team with minimal supervision

Flores Automation offers a very competitive compensation package, full benefits, and a casual work environment.
