

### Job Summary

Flores Automation is growing! Due to our continued success we have an immediate need to add an experienced **Machine Builder** to our team. If you have experience in fabrication, machining, and machine building, and like a family yet fast paced environment, we encourage you to apply. The position is at our headquarters in Muskego, WI which includes a modern manufacturing facility.

### Responsibilities and Duties

Primary purpose is to build machines and accessory equipment in house per engineering specifications and company quality standards. Secondary purpose is to assist the service group with the installation of machines and accessory equipment at customer sites as needed.

### Qualifications and Skills

The following skills will ensure success in this exciting role:

- Minimum 2 years of proven successful working experience in machine building and fabrication.
- Minimum education of a high school diploma. Technical degree in related field a plus.
- Solid organizational skills to include attention to detail and multitasking.
- Experience using hand tools, machining, and light fabrication.
- Proven ability to read and understand mechanical drawings.
- Ability to travel overnight periodically.

### Compensation

Compensation will be based on experience. This is a full-time hourly position with full benefits.
